

Curb Roller Manufacturing's Hydra-Pack HP1300 is a heavy-duty hydraulic power unit with a powerful 13HP Honda GX390 engine. Thanks to the ease of portability, the HP1300 is perfect for those job sites where a skid loader or mini excavator won't fit. This unit has adjustable PSI with a max PSI of 2300.

11 GALLON

HYDRAULIC RESERVOIR CAPACITY

5-8 GPM

HYDRAULIC FLOW

2300 PSI

MAXIMUM HYDRAULIC PRESSURE

**SEAMLESSLY RUNS
THE CURB ROLLER &
HYDRA-SCREED**

**3 POSITION
DETENT VALVE**

The HP1300 doesn't just provide an abundance of power, it is also easy to handle and maintain. It features an 11-gallon, 12-gauge steel reservoir to provide plenty of hydraulic fluid and cooling capacity to power tools for building renovation, highway maintenance and utility work, while the 13" flat-free tires allow you to navigate through the rough terrain of any job site. At the size of a standard generator, the Hydra-Pack HP1300 easily fits in the back of your pickup or job trailer.
