

COMPACT CONVENIENCE

MODULAR CONCRETE SCREED SYSTEM

The versatile Lynx Screed System provides a series of linkable screed pipes to accommodate concrete pours in varying widths from 3 to 22 feet. Unlike traditional roller screeds, the Lynx modular system removes the need for purchasing dedicated pipe lengths to offer easy adaptability for a multitude of pours.

7/16 & 11/16

NUTS & BOLTS FOR EASY ASSEMBLY

5 TO 10 MINUTES

SET UP TIME - NO RIGHT OR LEFT TO PIPES

3' TO 22'

CONNECTION ADAPTABILITY

3-, 5-, 6-, 7-, 8-, & 9- FOOT PIPE LENGTH OPTIONS

UNIVERSAL COMPONENTS

How does it work? The operator places the centering ring between their two chosen pipe lengths, securely seating them together. Using the cutouts at the pipes' ends, the operator can easily insert three bolts. Finally, by tightening the nuts, the pipes are linked. This quick, secure design removes the need to retighten pipes mid-job or worry about unthreading.

- ✓ No special stands or set-up equipment
- ✓ Multiple pipe combinations
- ✓ Ambidextrous spin direction
- ✓ Can be connected in any sequence
- ✓ Aluminum design provides light, easy transport
- ✓ Compatible with the Batt Screed and Eel Screed
